

# Digital Embedding

We accompany you as a “co-pilot” in the digital transformation of your business model to successfully implement and sustainably establish it in your organization.

## “Common” challenges in the sustainable embedding of a digital transformation

- \_ Which organizational prerequisites and basis must be created to introduce digital business models and embed them in the long term?
- \_ How is scalability ensured in the collaboration with “third parties” and the required processes?
- \_ To what extent is the organization and its business model prepared for a digital transformation?
- \_ How is innovation encouraged in the organization and within teams?
