

Reducing IT costs to finance innovation

Fast strategic cost assessment to identify focus areas to reduce your IT spend

Our IT spend analysis model

- Reassign major cost positions to 4C standard cost types for IT organizations
- Analyze major supplier contracts for cost savings potential ordered by cancellation date

- Understand technical architecture of main cost positions to estimate cost savings potential for each cost type
- Derive cost savings potential for each cost type with established 4C cost savings measures

- Consolidate all cost saving measures ordered by implementation timeline and simplicity
- Align implementation roadmap for the next 3-12 months with key stakeholders

Your benefits

- Strategic cost assessment according to market-based IT-service shaping
- Driver model of IT costs for higher agility and flexibility of IT consumption
- Defined measures for applications, infrastructure, and cross functions to increase cost-effectiveness in the IT organization
- Estimated potential and implementation effort for each measure
- Proposal for implementation timeline of each selected measure (roadmap)
