

Use Case

Target Operating Model und Digital Roadmap

at Viessmann, a leading manufacturer of heating technology products and a family-run group

The initial situation

Decentralized alignment led to a high degree of complexity, which meant that the overall setup needed to be reviewed from the perspective of the finance organization in terms of effectiveness and efficiency.

The approach

Developing core action areas to align the Finance organization with growth objectives.

The benefits for the customer

Complete transparency on the causes of the current challenges, including the individual options for action.
